**QUESTION 1**

You are using Test Studio to test a Power Apps canvas app. You need to ensure that the app conforms to several use cases. What should you do first?

- A. Save the app to the cloud.
- B. Create test cases for each requirement.
- C. Save the app to your computer.
- D. Create a test suite.
- E. Record test cases for each requirement.

Correct Answer: D

Create a test suite.

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-test-studio>

QUESTION 2

You have a Power Platform solution that uses Common Data Service.

You need to secure all fields that support field-level security.

Which field can you secure?

- A. createdon
- B. accountid
- C. owninguser
- D. description

Correct Answer: D

Which fields can be secured?

Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.

ownerid, processid, stageid, accountid, contactid

createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage_Timestamp, modifiedon, OnHoldTime, overriddencreatedon

statecode, statuscode

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

QUESTION 3

You are creating a canvas app.

You need to display a limited list of choices to the end user. You must standardize the values and appearance of the list across all forms.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add a drop-down field in the app
- B. Create a Global Option Set
- C. Add a new business rule
- D. Add a component to the component library

Correct Answer: AB

A global Option Set can be shared across entities.

Reference: <https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/>

QUESTION 4

You need to implement the change requested by the operations manager. Which control should you use?

- A. Camera
- B. Shape
- C. Add picture
- D. Image

Correct Answer: D

Scenario: The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.

Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.

Incorrect Answers:

C: Add Picture: With this control users can take photos or upload image files from their device and update the data source with this content. On a mobile device the user is presented with the device's choice dialog to choose between taking a photo or selecting one already available.

This control is a grouped control containing two controls: an Image and an Add picture button. The Image control shows the uploaded image or a placeholder if no image has been uploaded. The Add picture button prompts for an image to be uploaded.

Not: If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.

Reference: <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image>

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app.

Solution:

1.
Add a display form to Screen_AccountDetail.
2.
Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
3.
Set the data source of the form to Accounts.
4.
Set the Item property of the form to Selected.
5.
Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate (Screen_Accounts). Does the

solution meet the goal?

A. Yes

B. No

Correct Answer: A

If you add a Display form control, the user can display all fields of a record or only the fields that you specify.

Reference: <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form-detail>

QUESTION 6

A company is using Power Automate and Microsoft Teams. Users upload Microsoft PowerPoint presentations to the company's SharePoint site.

You must add a post to the company's Teams channel whenever a new presentation is uploaded. The post must include the presentation name and additional information about the presentation.

You need to configure Power Automate.

What should you use?

A. Adaptive card with a Teams connector.

B. File upload with a SharePoint connector.

C. Team member object with a Teams connector.

D. Power Automate flow with a Power Virtual Agents connector.

E. Data Operation with a SharePoint connector.

Correct Answer: A

*

Teams connector Send a message in Teams using Power Automate You can use Power Automate to set up a flow that sends messages to a Teams Channel or group chat using the Microsoft Teams connector. Messages can be posted either as the user who's signed into the connector in the flow or by using the Flow bot.

*

Adaptive cards Business Use Case We have a SharePoint Document Library that acts as a content repository for Procurement Invoices. Upon the upload of a new invoice, we would need to intimate the Finance Controller directly in this Teams Chat. To achieve this, we will use Power Automate and Send the Notification as an Adaptive Card to the User's Team Chat.

Note: Adaptive cards within Power Automate may either share blocks of information or collect data via a form for a given data source.

Reference: <https://learn.microsoft.com/en-us/power-automate/teams/send-a-message-in-teams> <https://powerusers.microsoft.com/t5/Power-Automate-Community-Blog/Send-an-Adaptive-Card-to-Microsoft-Teams-using-Power-Automate/ba-p/1512206>

QUESTION 7

DRAG DROP

You create an app with multiple screens.

Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.

You need to create a reusable gallery that displays information based on the current record.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Select and Place:

Actions

- Add a gallery control.
- Add an input property.
- Create a component.
- Add a screen.
- Create a form.
- Add an output property.

Answer Area

Correct Answer:

Actions

-
-
- Create a component.
-
- Create a form.
- Add an output property.

Answer Area

- Add a gallery control.
- Add a screen.
- Add an input property.

Step 1: Add a gallery control Add a gallery to a blank screen

1.

On the Insert tab, select Gallery, and then select Vertical.

2.

On the Properties tab of the right-hand pane, open the Items list, and then select your Gallery

Step 2: Add a screen

Add a gallery in a screen

1. On the Home tab, select New screen > List screen.

A screen that contains a Gallery control and other controls, such as a search bar, appears.

Step 3: Add an input property

Input property is how a component receives data to be used in the component.

Incorrect Answers:

Output property is used to emit data or component state. For example, the Selected property on a Gallery control is an output property.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-gallery>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component>

QUESTION 8

DRAG DROP

A call center manager monitors incoming phone calls. The manager analyzes the performance of phone reps by using a custom view. The view contains a custom field named Phone call Duration in Minutes.

The call center manager must present an Excel spreadsheet daily to upper management. The spreadsheet must contain the call center performance for further trending analysis and corrective actions.

You need to create the spreadsheet.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Create a pivot table, and then use the Phone call Duration in Minutes field as a category area and the Rep field as a series

Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes field as a series

Set the formula for phone call duration in minutes to Average and add a pie chart linked the pivot table

Export the custom view to an Excel dynamic spreadsheet

Export the custom view to an Excel dynamic pivot table

Save the spreadsheet and upload it back to the system

Export the custom view to an Excel template

Answer Area

Correct Answer:

Actions

Create a pivot table, and then use the Phone call Duration in Minutes field as a category area and the Rep field as a series

Export the custom view to an Excel dynamic spreadsheet

Export the custom view to an Excel template

Answer Area

Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes field as a series

Set the formula for phone call duration in minutes to Average and add a pie chart linked the pivot table

Export the custom view to an Excel dynamic pivot table

Save the spreadsheet and upload it back to the system

Step 1: Export the custom view to an Excel dynamic pivot table You can export app data to an Office Excel PivotTable to see patterns and trends in data. An Excel PivotTable is a great way to summarize, analyze, explore, and present your

app data. Step 2: Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes as field as series Step 3: Set the formula for phone call duration in minutes to Average and add a pie chart linked to the pivot table

Step 4: Save the spreadsheet and upload it back to the system. Reference: <https://docs.microsoft.com/en-us/powerapps/user/export-excel-pivottable>

QUESTION 9

DRAG DROP

You are designing a canvas app that will be used by all users including users who have vision impairments.

Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Select and Place:

Outcomes

- Not visible to any users
- Visible to sighted users only
- Visible to screen-reader users only
- Visible to both sighted and screen-reader users

Answer Area

- | Action | Outcome |
|--|---------|
| Set the values for the X and Y properties of a control to move the control off-screen. | Outcome |
| Set the Color and other related properties of a control to transparent. | Outcome |
| Set the Height and Width properties of a control to 1. | Outcome |

Correct Answer:

Outcomes

Visible to both sighted and screen-reader users

Answer Area

Action	Outcome
Set the values for the X and Y properties of a control to move the control off-screen.	Visible to sighted users only
Set the Color and other related properties of a control to transparent.	Visible to screen-reader users only
Set the Height and Width properties of a control to 1.	Not visible to any users

Reference: <https://docs.microsoft.com/sv-se/powerapps/maker/canvas-apps/accessible-apps>

QUESTION 10

You have been tasked with creating apps for your company.

You want to make use of a Power Platform tool that will make sure that an email is sent to a manager whenever a specified event occurs.

You make use of Power Automate.

Does the action achieve your objective?

- A. Yes, it does
- B. No, it does not

Correct Answer: A

Power Automate is a service that helps you create automated workflows between your favorite apps and services to synchronize files, get notifications, collect data, and more.

Reference: <https://docs.microsoft.com/en-us/power-automate>

QUESTION 11

HOTSPOT

You are a technical assistant for a legal services organization. The company uses SharePoint to manage documents and Microsoft Dataverse as the data store. The company has strict rules about access, permissions, and privacy.

Lawyers and paralegals use Microsoft Teams for communications and collaboration. Employees use personal devices to access legal files. You do not have access to the admin area in Microsoft Power Platform.

You need to ensure that these rules are observed consistently and managed in one place.

Which type of app should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

App type

Access client billing details

	▼
Canvas app in Microsoft Teams	
Canvas app in SharePoint	
Model-driven app in SharePoint	
Model-driven app in Microsoft Teams	

Log phone calls and schedule appointments with clients and the team assigned to them

	▼
Dynamics 365 App for Outlook	
Microsoft Teams calendar	
SharePoint calendar	

Correct Answer:

App type

Access client billing details

	▼
Canvas app in Microsoft Teams	
Canvas app in SharePoint	
Model-driven app in SharePoint	
Model-driven app in Microsoft Teams	

Log phone calls and schedule appointments with clients and the team assigned to them

	▼
Dynamics 365 App for Outlook	
Microsoft Teams calendar	
SharePoint calendar	

Box 1: Model-driven app in Microsoft Teams

A user's ability to see and use apps is controlled by sharing the application with the user. Sharing of canvas apps is done directly with a user or Azure AD group but is still subject to Dataverse security roles. Sharing of model-driven apps is

done via Dataverse security roles.

Box 2: Sharepoint Calendar

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/database-security>

QUESTION 12

You have recently built a canvas app.

When you are informed that a user cannot discern the field that is currently in focus, you run App checker.

You want to make sure that the value of the focused border thickness is more than zero.

You examine the Formulas results section of the App checker.

Does the action achieve your objective?

A. Yes, it does

B. No, it does not

Correct Answer: B

QUESTION 13

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing.

Solution:

1.

Provision production environments named P1 and P2.

2.

Copy the current production environment to P1 and P2.

3.

Use P1 for development and P2 for testing. Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

Production: This is intended to be used for permanent work in an organization.

Don't use production environment for development and testing.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>
